EDUCATION

University of Southern California M.S., Applied Data Science	Jan 2024 - Dec 2025 Los Angeles, CA
SRM Institute of Science and Technology B.Tech, Computer Science & Engineering, AI/ML Track	Jun 2019 - Jul 2023 Chennai, India

TECHNICAL SKILLS

Languages and Data: Python, SQL, JavaScript, pandas, NumPy, SQLite
Machine Learning: TensorFlow/Keras, OpenCV, MLflow, model evaluation
Generative AI: Retrieval-augmented generation (RAG), embeddings, LLM evaluation, Inspect AI, Ollama
Engineering: FastAPI, Flask, REST APIs, Docker, pytest, Git, GitHub Actions CI/CD, React

EXPERIENCE

Easley-Dunn Productions, Inc. AI/ML Engineer Intern, Gameplay Analyzer Team	Aug 2026 - Present Remote
- Built a Python/OpenCV workflow mapping NFL Blitz gameplay to field coordinates using yard-line and painted-number detection; development scope: 4 clips, 873 frames. - Ran six controlled diagnostic test categories; identified narrow 8.5-17-yard correspondence spans as a field-alignment failure mechanism and investigated midfield mirror ambiguity.	
Agent Shield, Independent Research Independent Researcher, LLM Security and Evaluation	May 2025 - Jul 2026 Remote
- Engineered six-module Python/Inspect AI evaluations of prompt injection, tool poisoning, and behavioral drift across four LLMs; retained raw logs and commit IDs for reproducibility. - Built utility, attack-success, and transparency metrics; screened untrusted text and quarantined poisoned MCP tool catalogs at runtime, verified with pytest and GitHub Actions CI.	
USC Viterbi School of Engineering Research Assistant, Computer Vision & Medical Imaging Lab	Jun 2024 - Dec 2024 Los Angeles, CA
- Built retinal-segmentation training masks through channel differencing, RGB/HSV threshold searches, and contour cropping for the team's TensorFlow/Keras U-Net. - Refined RITE/FIVES masks with horizontal flips; contributed to the MLflow-tracked team pipeline (~0.94 AUC, 94% pixel accuracy) and prepared validation artifacts for faculty review.	
Yashoda Hospitals Data Analyst Intern	Nov 2022 - May 2023 Remote
Performed insurance-document EDA and built Power BI/Tableau dashboards to help doctors review key information.	
RB Associates Automation Engineering Intern, Finance and Accounting	Aug 2021 - Sep 2022 Remote
Automated reconciliation with Python/pandas data standardization, schema checks, SQL storage, rule-based transaction matching, and human review; validated outputs against manual calculations.	
SSN College of Engineering Research Intern, Computer Vision & Object Detection	Jun 2021 - Jul 2021 Remote
Implemented YOLOv5/OpenCV video detection; tested reliability under lighting, motion, and occlusion and documented failures.	

PROJECTS

- AI Health Journal | Python, Flask, Ollama, Docker**
- Built a local-default RAG assistant and storage; compared four retrieval strategies on 24 queries to select an embedder.
 - Implemented schema validation, retries, groundedness checks, and neutral fallbacks; verified 326 tests in 26 files and Docker HTTP 503 handling when Ollama is unavailable.
- AI RemixMate | Python, FastAPI, React, Demucs**
- Built an audio ML inference pipeline analyzing tempo, key, energy, and phrases; integrated Demucs stem separation and per-stem similarity scoring for beat-aligned crossfades.
 - Added asynchronous jobs, SQLite storage, and Server-Sent Events progress; froze the mixer for reproducible reference renders.
